ABOUT ME

Backend-focused Computer Engineering student with hands-on experience building full-stack web applications using C#, ASP.NET, React, and MySQL. Strong foundation in REST APIs, databases, and cloud services. Motivated to grow as a backend developer and contribute to real-world software projects.

EDUCATION

Student

[Lucian Blaga University of Sibiu](#) – Faculty of Engineering | 2023-2027

WORK EXPERIENCE

Graffino | January 2026 - February 2026

Full-Stack Intern

- Designed and built a service marketplace platform (plumbers, electricians, lawn care).
- Developed RESTful backend using C# / ASP.NET.
- Built frontend UI with React.
- Implemented MySQL database for users, services.
- Integrated Google Cloud storage for image uploads.
- Handled API integration, validation, and error handling across frontend and backend.
- Implemented authentication & role-based access (service providers vs customers).

[TeScapDeAmenda.ro \(Personal Project\)](#) | Mar 2026 - Present

Full-Stack Developer

- Designed and built an end-to-end legal contestation platform for Romanian traffic fines.
 - Developed RESTful backend using C# / .NET 8 ASP.NET Core.
 - Built responsive frontend UI with React 19, TypeScript, and Tailwind CSS.
 - Integrated Vision AI via OpenAI / OpenRouter for structured data extraction from images.
 - Engineered dynamic generation of personalized legal contestation documents.
 - Managed deployment using Docker and Nginx.
 - Implemented custom exception middleware for robust end-to-end error handling.
-

SKILLS

- C# with ASP.NET
- HTML, CSS
- REST API's
- React,
- Firebase
- MySQL
